

PROPAFILM™

We've got it all wrapped up

Acrylic Coated Films
for Shelf Appeal

use our imagination...

High Gloss Films

High clarity and gloss levels are pre-requisites for many markets where on-shelf appeal is important to the brand. The packaging needs to showcase the product and have a high visual impact. Our acrylic coated films meet these requirements as they offer excellent optical properties.

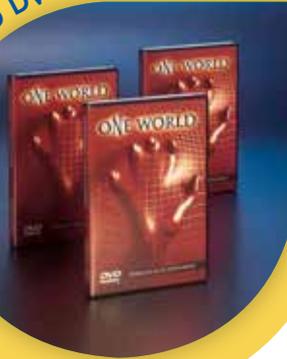

With their broad sealing range, these films also enable excellent packaging machine performance. Our standard materials provide strong seals for tamper evidence, however easy opening alternatives are also available.

Applications

BISCUITS AND BAKERY

COMPUTER GAMES AND DVDS

CONFECTIONERY

COSMETICS

PERFUME

REAMWRAP

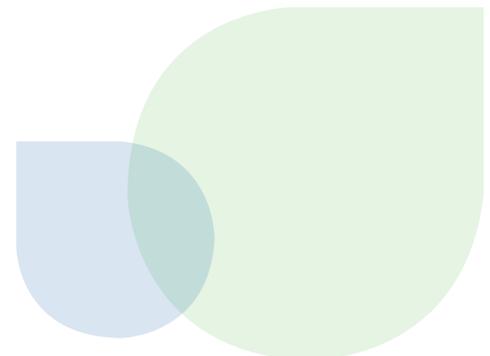

Markets

- Biscuits and Bakery
- Computer Games
- Confectionery
- Cosmetics
- DVD's
- Perfume
- Reamwrap

Applications

- Box Overwrap
- Heavy Duty
- HFFS
- Lamination
- Pre-Made Bags
- Printing
- VFFS

Why Choose These Films?

QUALITY LOOK

With their superb clarity and high gloss, our acrylic coated films are ideally suited to markets where shelf appeal is important to the brand.

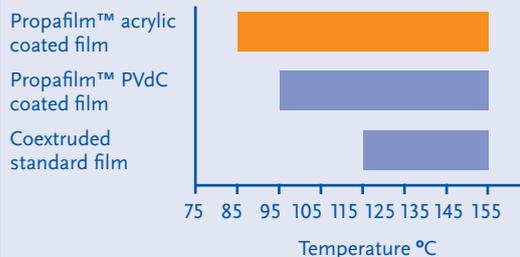

These properties, combined with excellent printability, ensure that the packaging conveys an image of quality and maximises visual impact.

In addition, our unique shrink tightening version enables tighter wraps.

BROAD SEALING RANGE

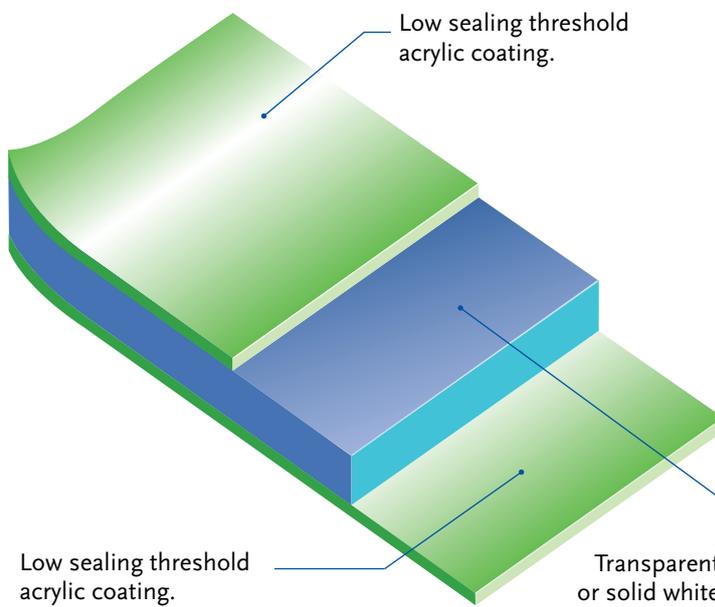

The low sealing threshold and broad sealing range of our acrylic coated films allow a wide packaging operation window.

Typical Heat-Seal Range (15PSI 2s)

TAMPER EVIDENT SEALS

Strong seals every time.

MINERAL OIL BARRIER

Discover our cost effective proven mineral oil barrier films for peace of mind.

NO STICKING TO COEX

Our acrylic coated films do not seal to coextruded films. They are ideally suited to bundle wrap or transit collation applications: high visibility of the unit packs is ensured, without any sticking issues.

EASY OPENING OPTIONS

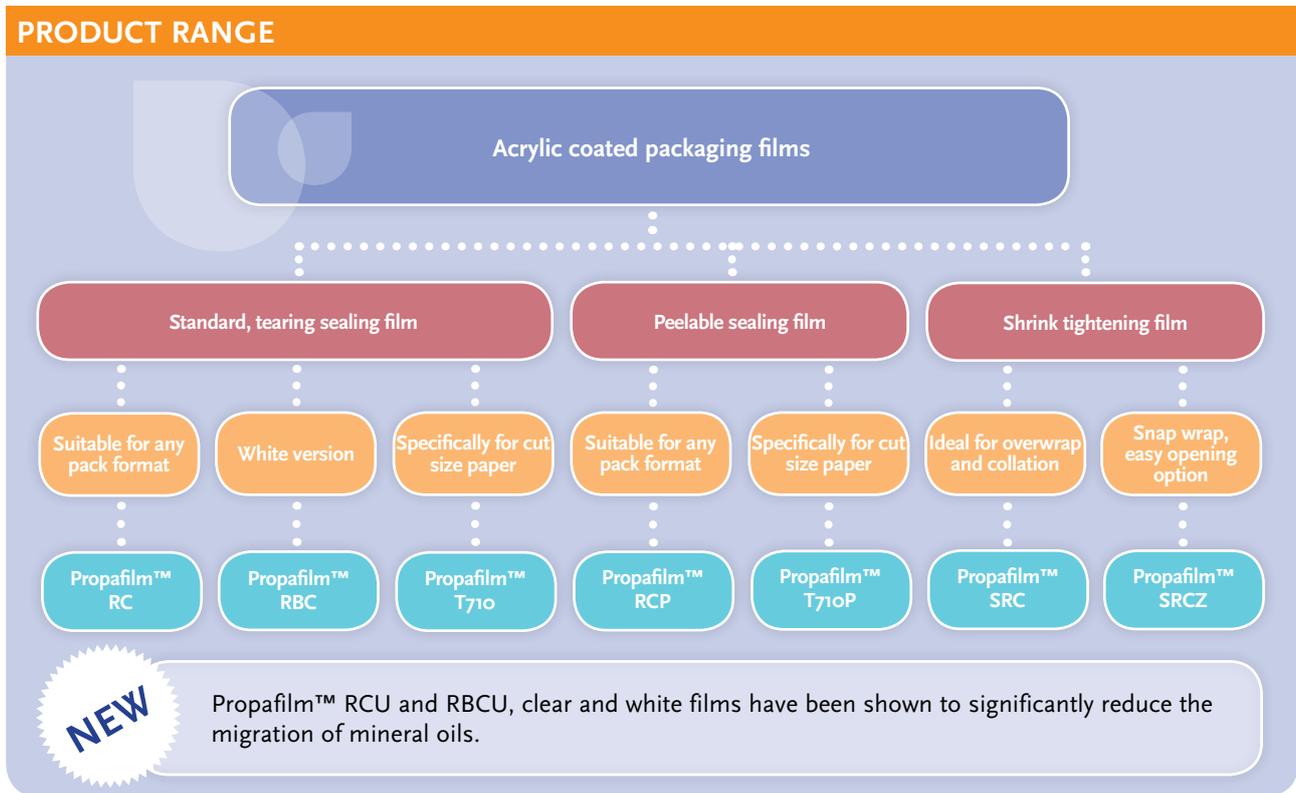

Our peelable film enables customers to easily peel open their packs, without tearing the packaging and spilling any of the contents. This is particularly useful for bags with small contents and for products targeted at younger or older audiences.

Our snap wrap film is specifically targeted at collation bundles, enabling two packs to be 'snapped off' at a time and the rest of the bundle to remain neatly collated for storage.

Typical Heat-Seal Properties

Product	Heat-seal strength in g/25mm (15 PSI, 2s, 130°C)
Propafilm™ RC30	650
Propafilm™ RC30 to coextruded film	0

PRODUCT RANGE

In addition to these films, our product range also includes differential grades with an alternative coating on the other surface : PVdC, fast or digitally printable coatings.

About Us

Innovia Films is a major producer of highly differentiated Biaxially Oriented Polypropylene (BOPP) films using a proprietary 'bubble' manufacturing process. The unique functional properties of our film, combined with our world leading coating and surface chemistry expertise, results in products which are very well recognised and valued by our customers.

We hold a leading global position in the markets we serve – high performance coated films, tobacco overwrap, labels and security films. Technical expertise and market-driven developments are key to our position at the leading edge of advances in these markets.

Our production sites are based in Australia, Belgium and the UK. Service and support alongside product quality is a priority for us. Our strong network of commercial offices, agents and distributors globally support our sales into around 100 countries worldwide, ensuring a high level of customer responsiveness.

Innovation through our Research and Development is at the heart of our business. We work closely with customers, suppliers, academics and commercial partners to ensure speed of delivery of new products.
